Stay ahead with a Multi-line SIP

Affordability - Lower costs due to elimination of the need to purchase expensive hardware plus the integration of a flat rate concept, making it an investment that gives you better value for your ringgit.

Flexibility - Number of concurrent calls that can be adjusted according to your business needs, plus the ability for each employee to have their own phone line.

Scalability - Easiness of adding, subtracting & changing the number of lines as your business grows.

Solutions - Simplicity in managing your business via better technology and call quality, thus saving you time and the hassle.

Traceability - Usage of a dedicated channel that ensures call quality and easy monitoring.
