

Wholesale Internet Access

Wholesale Internet Access (WIA) is a premium Internet service for licensed operators of Internet Service Provider (ISP) networks and content providers. Designed to cater to high-speed and dedicated Internet access requirements, WIA offers the highest network scalability, security and flexibility to customers.

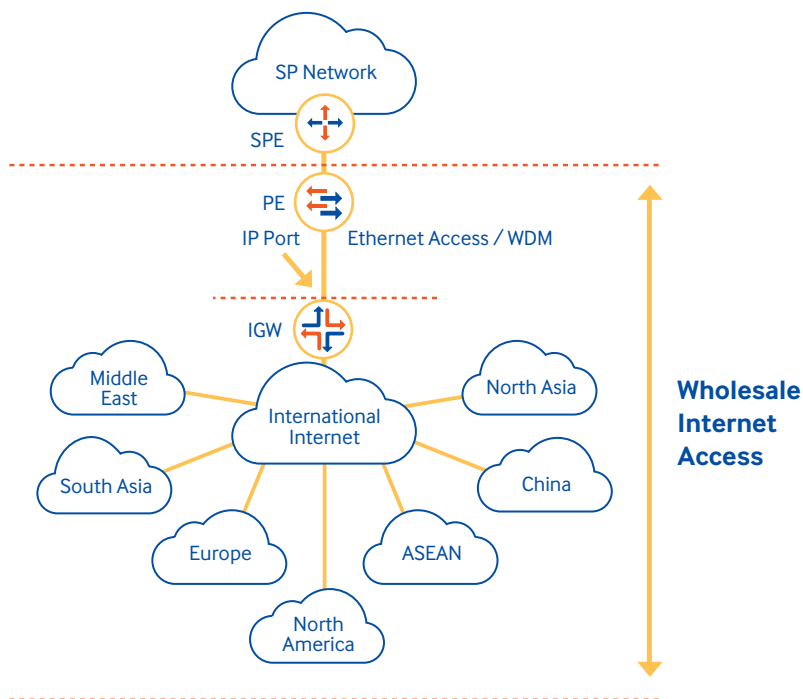

Our Services

Wholesale Internet Access

Layer 3 Connectivity to Internet

Connects service providers to TM's Internet network via extensive IP connectivity worldwide at a medium speed of 20Mbps which is burstable anytime for any special event.

Secured Internet Service

Provides Anti-DDOS solutions to secure the WIA services from any anonymous attack.

Key Benefits

Nationwide Infrastructure Availability

Provides more than 100 **regional Ethernet** nodes nationwide.

Scalability

Offers **immediate bandwidth upgrade** without any service disruptions to maximise business capability.

Content-Rich Platform

Multiple private and **public peering** with domestic and global providers which enable content-rich Internet platforms.

IPv6-Enabled

IPv4 and IPv6 can run **seamlessly** using dual-stack approach.

Value Added Services

Offers Anti-DDOS solution to **protect** the service and enjoy burstable service for any special event.

24 / 7 Customer Service Centre

Round-the-clock support by experienced service engineers and technicians.

Solution Consultant

Consultancy services are provided to ensure the best solutions possible.

Plug-and-Play

Uses Metro-Ethernet or WDM (Wave-Division-Multiplexing) technology for access and IP ports to **simplify** network upgrades and configuration.

Fully Managed Connectivity, Performance and Quality

Flexibility in Service Design

Applications

Suitable for licensed operators with key businesses in ISP networks and content providers.
